

Installation Instructions

Security Screw Kit for VidaMount OpenVESA / VESALite Enclosures

SKU: VB_OPENVESA_SSK

This kit includes:

- (2) Pin-in-Hex Security Screws

Compatible only with:

- VidaMount OpenVESA /
VESALite Enclosures

IMPORTANT:

Matching tools are not included
and sold separately.

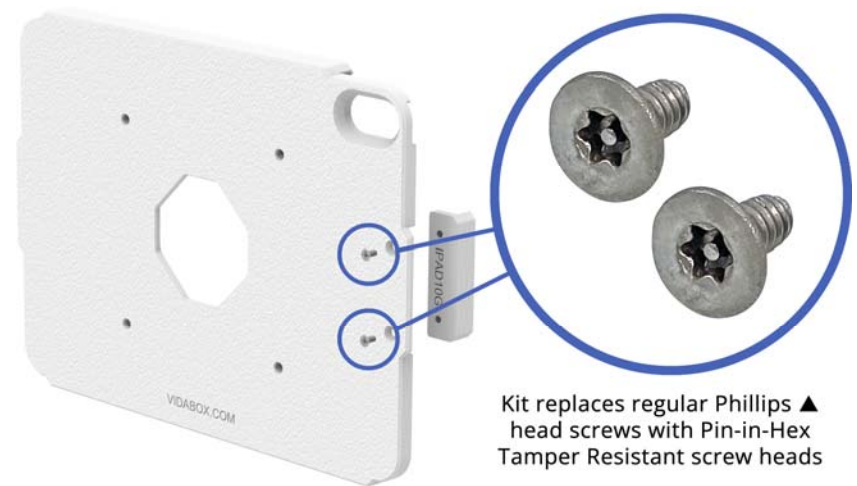

1. Remove the (2) screws from the back of your OpenVESA or VESALite enclosure, as shown in the diagram on the right. (Your enclosure may differ in appearance)

2. Replace the regular / non-security screws with the Pin-in-Hex security screws kit in this package.

3. Use the Matching Tool to tighten and install the security screws into the back of the enclosure.

4. Once installed, the enclosure cannot be disassembled without using the special, matching tool.

5. Setup is now complete!

Kit replaces regular Phillips ▲ head screws with Pin-in-Hex Tamper Resistant screw heads

Need the matching tool? Search for SKU / Part Number:

VB_TOOL_TRB_T8

Sold separately / not included.
